PROFESSIONAL SUMMARY

CX / Service Designer transitioning from a data- and process-driven Business & CX Analyst background, backed by a Master of Information (UX Design) from the University of Toronto. Experienced in translating stakeholder and user research into service blueprints, journey maps, and hi-fi prototypes, with a track record of using data to justify design and process decisions. Seeking entry-level CX/Service Design, UX/UI, or Product Design roles where research rigor and business context both matter.

EDUCATION

University of Toronto	Sep 2024 – Jun 2026
<i>Master of Information, Information Systems Design & UX Design concentration · Toronto, ON</i>	
BrainStation <i>Software Engineering Diploma (Bootcamp) · Vancouver, BC</i>	Feb 2024 – May 2024
University of Alberta <i>B.A. Philosophy, Minor in East Asian Studies · Edmonton, AB</i>	Jul 2017 – May 2021

SERVICE DESIGN & UX/UI PROJECTS (GRADUATE COURSEWORK, GROUP-BASED)

Service Design for Elections Ontario's New Internship Program	Jan – Apr 2026
- Led service design, as part of a 5-person team, for a new one-year internship program at a provincial election administration agency, addressing gaps in onboarding, milestone tracking, and transition to early-career roles for graduate interns. - Synthesized stakeholder and user interview data into a future-state journey map; co-designed and prototyped a badge system spanning front-stage (physical welcome kit, digital platform) and backstage (internal job portal) touchpoints. - Ran 2 rounds of usability testing and iterated the prototype based on feedback; the client rated our solution the highest among 12 competing teams. - Defined KPIs and mapped stakeholder roles (HR, IT, Hiring Managers) across a phased implementation roadmap to support adoption and long-term talent retention.	
RadioVision: Healthcare Technology Marketing Website	Jan – Apr 2026
- Conducted UX research (stakeholder interviews, competitive audits, and a 200+ respondent survey analyzed in <i>Python/pandas</i>) for a healthcare technology company's website serving both B2B and B2C audiences, as part of a 5-person team. - Designed a <i>Figma</i> design system and hi-fi UI prototype, mapping the user journey and iterating the design based on quantitative survey analysis to strengthen brand positioning.	
Flot: AI Workplace Sustainability Tool	Mar 2026
- Initiated the concept for Flot, a mindful AI workspace that tracks environmental impact and rewards sustainable AI usage; led UI design in <i>Figma</i> based on user interviews and desk research, as part of a 3-person team. - Won 1st place at the 24-hour <i>UDesign Designathon 2026</i>.	
iSchool Wayfinding Redesign: Accessible & Inclusive Wayfinding System	Sep – Dec 2025
- Proposed an accessible wayfinding redesign for a university campus building, as part of a 6-person team, conducting on-site field observation to identify navigation pain points (inconsistent signage, unclear floor logic, no digital wayfinding tools). - Designed a 3D building map in <i>Rhino</i> and prototyped consistent signage and orientation cues in <i>Figma</i>.	
Personal Portfolio Website	Jun 2026
Designed and built a responsive portfolio website (<i>Next.js</i>, <i>Three.js</i>, <i>Tailwind CSS</i>), independently, to showcase design and development projects; deployed on <i>GitHub Pages</i>, iterating on functionality with AI-assisted coding tools.	

ENTERPRISE & BUSINESS SYSTEMS PROJECT

Future-State Enterprise & Systems Architecture for a Financial Institution	Feb – Apr 2026
- Led a future-state enterprise and systems architecture analysis for a financial institution navigating post-merger data integration and a shift toward real-time, agent-driven decision-making. - Applied the <i>Zachman Framework</i> and <i>ArchiMate</i> to model two future-state scenarios, standardizing 10 core entities into a canonical enterprise data model and designing new governance structures; this work translated complex banking data and system constraints directly into design decisions.	

WORK EXPERIENCE

University of Toronto, Faculty of Information · Career Services Team	Sep 2024 – May 2026
<i>Business Development & Data Analyst · Started as Co-op, converted to Full-time Contract</i>	Toronto, ON

- Mapped the end-to-end service journey through which 2,000+ students discover and access Career Services support (newsletters, events, job postings, guides), applying service design thinking to identify communication gaps and introduce new engagement channels.
- Designed the content structure and layout for weekly newsletters and data visualization reports, translating CRM, employment-trend, and hiring data into clear formats for internal stakeholders and student audiences.
- Analyzed CRM reports, historical data, and employment trends to build a student hiring outreach plan, doubling job postings from 500 to 1,000.
- Collaborated on the design and delivery of 5+ major career events per semester (job fairs, employer panels, peer-to-peer connectors), each drawing 180+ student attendees.

Fortune Canada Business Consulting Inc.

Mar 2022 – Sep 2023

Project Manager (immigration & visa advisory services)

Richmond, BC

- Led the transition from Excel-based client tracking to a centralized CRM system for a 20-person team, redesigning the process to fit the Canadian immigration application workflow, a process/systems redesign directly transferable to CX and service design work.
- Managed migration and restructuring of 130+ client case records into the new CRM, defining the metadata model used for ongoing case management.
- Analyzed market and search trends to guide a website rebuild with the IT team, reaching 2,000 daily visitors and a #1 Google (Chinese-language) ranking for "Immigration to Canada."
- Represented the company at the Chengdu Immigration Industry Summit, building relationships with 20+ business partners.

Fortune Canada Business Consulting Inc.

May 2021 – Feb 2022

Marketing Specialist

Richmond, BC

- Designed the company's brand identity and a full suite of promotional materials.
- Researched shifts in Canadian immigration policy to align marketing strategy with client demand.
- Ran digital marketing campaigns across key platforms, growing engagement and online community size.

SKILLS

Service Design & UX Research: Service Blueprinting, Journey Mapping, Stakeholder & User Interviews, Usability Testing, Co-Design Workshops, Competitive Analysis, Rapid Prototyping (Lo-Fi to Hi-Fi), *Figma*

CX Strategy & Business Analysis: CX Strategy, Process Mapping (*BPMN, ERD, DFD*), Enterprise Architecture (*Zachman, ArchiMate*), Requirements Documentation (*SRS*), Stakeholder Communication & Reporting, SOP Development, *Agile/Scrum*

Technical: *HTML, Tailwind CSS, JavaScript, React.js, Python, MySQL, Adobe Photoshop, Jira*, AI-assisted prototyping

Languages: English, Mandarin Chinese (bilingual)
